# The F250 EcoChiller

The F250 is the ideal choice for replacing tap water in cooling applications.

Reduction of facility water costs enables a fast ROI while saving fresh water resources

Due to its high efficiency, the F250 is an economic and environmentally friendly alternative to conventional tap water cooling.

## Features & Benefits

- Environmentally friendly operation with Low energy consumption
- No side vents, instruments can be placed right next to other equipment
- All wetted parts made of stainless steel or high grade plastic
- Compact design and small footprint
- Splash-proof keypad
- Large, bright LED display
- Easy filling
- Drain tap
